The output power listed is rated; measured conducted output power as allowed by 47 CFR 90.205(s) is 50.7W in VHF band and 40.3W in the UHF band. The antennas used for this transmitter must be vehicle-mounted and must be installed to provide the configurations and separation distances as described in this filing. RF exposure compliance was evaluated using a 2.15 dBi vehicle-mount antenna for the VHF band and 5.0dBi vehicle-mount antenna for the UHF band. This transmitter must operate in push-to-talk mode with a duty factor not exceeding 50% and must be restricted to work related operations in an Occupational/Controlled RF exposure Environment. All qualified end-users of this device must have the knowledge to control their exposure conditions and/or duration to comply with Occupational/Controlled exposure limit and also have control of the exposure conditions of bystanders for complying with General Population/Uncontrolled exposure limit. A label, as described in this filing, must be displayed on the device to direct users to specific training information for meeting Occupational Exposure Requirements.

EF: This device may contain functions that are not operational in U.S Territories except as noted in the filing. This grant has

extended frequencies as noted in the filing and Section 2.927(b) applies to this authorization.
