

INTERMEDIATE HAM RADIO CLASS

- Pass your General Class ham radio FCC license exam right in class.
- Live high frequency equipment demos, including emergency communications.
- Dipole antenna construction plus mobile antenna demonstrations.
- Multiple choice examinations with no Morse code test required.
- Learn how to put up “hidden” wire antennas to work the world!
- Discussions on which equipment to purchase and not to get stuck with junk.
- Learn high frequency net operating etiquette and procedures on live equipment.

Ham radio operators provide valuable communications in an emergency. Many cities throughout the country use ham radio operators to support Community Emergency Response Team (CERT) training and actual call-outs. This five-session class will feature live ham radio equipment for everyone to learn how to operate the world wide bands. With homework between sessions, spend a few weeks learning to get on the exciting worldwide bands by passing your amateur radio Element 3 General Class examination, given right in the classroom on the last session.
